Computer Physics Communications

Contents to volume 115

Computational physics

Simos, T.E.
An exponentially-fitted Runge–Kutta method for the numerical integration of initial-value problems with periodic or oscillating solutions 1

Decyk, V.K., C.D. Norton and B.K. Szymanski
How to support inheritance and run-time polymorphism in Fortran 90 9

Wei, G.W., D.S. Zhang, S.C. Althorpe, D.J. Kouri and D.K. Hoffman
Wavelet-distributed approximating functional method for solving the Navier–Stokes equation 18

Garrido, L. and A. Juste
On the determination of probability density functions by using Neural Networks 25

Fulling, S.A., I. Borosh and A. da Conturbia
Cataloguing general graphs by point and line spectra 93

Gracey, J.A.
Computation of perturbative renormalization group functions – the large N_f algorithm 113

Semenov, A.
LanHEP – a package for automatic generation of Feynman rules from the Lagrangian 124

Brücher, L., J. Franzkowski and D. Kreimer
xloops – automated Feynman diagram calculation 140

Baikov, P.A. and M. Steinhauser
Three-loop vacuum integrals in FORM and REDUCE 161

Fernández, F.M., R. Guardiola and J. Ros
Computer algebra and large scale perturbation theory 170

Portugal, R.
An algorithm to simplify tensor expressions 215

Klioner, S.A.
New system for indicial computation and its applications in gravitational physics 231

Christensen, S.M.
Large scale tensor analysis by computer 245

Socorro, J., A. Macías and F.W. Hehl
Computer algebra in gravity: Reduce–Excalc programs for (non-)Riemannian space-times. I 264

Jakubi, A.S.
Generalized power expansions in cosmology 284

Rutz, S.F.
Theorems of Birkhoff type in Finsler spaces 300

Wolf, T.
Structural equations for Killing tensors of arbitrary rank 316

d'Inverno, R.A.
Applications of SHEEP in General Relativity 330

Koutras, A. and J.E.F. Skea
An algorithm for determining whether a space-time is homothetic 350

Jerie, M., J.E.R. O'Connor and G.E. Prince
Computer algebra determination of symmetries in general relativity 363

Santosuosso, K., D. Pollney, N. Pelavas, P. Musgrave and K. Lake
Invariants of the Riemann tensor for class B warped product space-times 381

Delgaty, M.S.R. and K. Lake
Physical acceptability of isolated, static, spherically symmetric, perfect fluid solutions of Einstein's equations 395

Ayari, M.A., M.I. Ayari and V. Hussin
Computation of Lie supersymmetries for the supersymmetric two bosons equations 416

Hereman, W., Ü. Göktaş, M.D. Colagrosso and A.J. Miller
Algorithmic integrability tests for nonlinear differential and lattice equations 428

Sanders, J.A. and J.P. Wang
Combining Maple and Form to decide on integrability questions 447

Mansfield, E.L., G.J. Reid and P.A. Clarkson
Nonclassical reductions of a 3 + 1-cubic nonlinear Schrödinger system 460

Aldridge, J.E. and G.E. Prince
Computer algebra solution of the inverse problem in the calculus of variations 489

Abłamowicz, R.
Spinor representations of Clifford algebras: a symbolic approach 510

Dray, T. and C.A. Manogue
Finding octonionic eigenvectors using *Mathematica* 536

Computer programs in physics

Berends, F.A., C.G. Papadopoulos and R. Pittau
WEXTER and ERAFITTER: two programs to fit M_W at LEP2 using the best measurable kinematical variables 32

Hoyles, M., S. Kuyucak and S.-H. Chung
Solutions of Poisson's equation in channel-like geometries 45

Segura, J. and A. Gil
Parabolic Cylinder Functions of integer and half-integer orders for nonnegative arguments 69

Nguyen, N.-A. and T.T. Nguyen-Dang
Symbolic calculations of unitary transformations in quantum dynamics 183

Cyganowski, S. and J. Carminati
The Maple package NPTOOLS; a symbolic algebra package for tetrad formalisms in general relativity 200

Gomez, C. and T. Scott
Maple programs for generating efficient FORTRAN code for serial and vectorised machines 548

New version announcements

Torrens, F., M. Rubio and J. Sánchez-Marín
AMYR 2: A new version of a computer program for pair potential calculation of molecular associations 87

Abrashkevich, A.G., D.G. Abrashkevich, M.S. Kaschiev and I.V. Puzynin
FESSDE 2.2: A new version of a program for the finite-element solution of the coupled-channel Schrödinger equation using high-order accuracy approximations 90
